Professional Summary

AI/ML Engineer with 2 years of hands-on experience building practical AI solutions including agentic architecture and RAG frameworks. I've worked on LLM integration projects, developed document validation tools, and created an AutoML platform that's currently used by 100+ researchers. I'm passionate about solving complex problems with AI and have experience working with cross-functional teams to bring ML projects from concept to deployment.

Professional Experience

AI/ML Engineer Jan 2025 - Present
Periscope Labs, Dhaka

- Led **Agentic AI** framework for document validation using **RAG** architecture and multi-**LLM** approach (OpenAI, Mistral AI) to automatically validate invoices and policy documents against business rules, reducing manual review by 70%
- Engineered an **admin dashboard** for policy document management and control with **annotation** pipeline that identifies and marks policy violations directly in documents
- Designed loan default prediction pipeline using **time series analysis** and feature engineering, creating an **early warning system** that identifies at-risk customers 30 days in advance with 75% prediction accuracy

Research Assistant Jan 2024 - May 2025
Quantum Robotics & Automation Research Group, MIST

- Engineered an end-to-end **AutoML** solution (AKI) assisting 100+ researchers with intuitive flow covering data upload, preprocessing, visualization, model training, and deployment, eliminating coding barriers
- Built computer vision and AI-based assistive interface achieving 92% accuracy in **eye movement tracking**, empowering paralyzed and post-surgery patients with voice- and hand-free communication capabilities
- Directed 3 cutting-edge AI research projects contributing to research publications while mentoring 7+ junior researchers in machine learning projects

EDGE-AI Trainee Aug 2023 - Nov 2023
ITIL - World Bank Funded Program

- Completed intensive 160-hour AI specialization program funded by World Bank in partnership with Bangladesh Computer Council, focusing on enterprise-level AI implementation strategies
- Mastered industry best practices in AI deployment, model optimization, and production workflows, achieving top 5% performance in program assessments and practical projects

Education

BSc in Computer Science and Engineering Feb 2019 - Jan 2024
Military Institute of Science and Technology (MIST), Dhaka, Bangladesh GPA: 3.18/4.00

- Thesis: Development of an intelligent system for eye motion tracking and action prediction

Key Projects

- | | |
|---|------|
| Automated Document Processor
Tech Stack: Python, LangChain, LLMs, RAG, Mistral, Agentic AI, Weaviate, Docker | Demo |
| NexNews - AI News Fact Checker
Tech Stack: Python, LLMs, AI Agents, News API, Web Scraping | Demo |
| AutoML - Artificial Kinetic Intelligence (AKI)
Tech Stack: Scikit-Learn, ML Algorithms, Plotly, Python, MongoDB | Demo |

Eye Motion Tracking and Action Prediction Assistive System <i>Tech Stack:</i> Scikit-Learn, Machine Learning, TensorFlow, Computer Vision, Python	<i>Demo</i>
Controlling Robotic Hand from Remote Distance <i>Tech Stack:</i> Computer Vision, Arduino, Robotics	<i>Demo</i>
Child Companion AI Robot <i>Tech Stack:</i> Computer Vision, Neural Network, Mobile App(Flutter), IoT, Raspberry Pi, Arduino,	<i>Demo</i>

Technical Expertise

Specializations: LLMs, Agentic AI, RAG, Computer Vision, Fine Tuning LLMs, NLP
AI/ML: Deep Neural Networks, TensorFlow, PyTorch, Scikit-Learn, LangChain, LlamaIndex, OpenCV
Cloud: AWS, GCP(Partial), Docker, Git
Programming: Python, C/C++, SQL, MATLAB
Databases: MongoDB, Vector DBs (Weaviate, FAISS)
Tools: n8n, Streamlit, FastAPI, Jupyter, Docker
APIs: LLM API Integration, News API, Web Scraping
Soft Skills: Leadership, Collaboration, Research

Awards & Recognition

Champion - AI Hackathon 2025 (Healthcare) Bangladesh Innovation Conclave — Managed a team of 3, designed an AI application for healthcare sector	<i>Certificate</i>
Highest-Ranked Submission - BEAR Summit 2025 (AI Onsite Display) Code AI-048 — Qualified for on-site display	<i>Certificate</i>
1st Runner-Up - BEAR Summit 2025 (AI Demo) Bangladesh National Semiconductor Symposium — submission code AI-047	<i>Certificate</i>
Global Champion - University Rover Challenge University Rover Challenge - The Mars Society — Competed against 20+ teams worldwide	<i>Certificate</i>
21st Century Employability Skilling Program - Advanced Wadhwani Foundation — Advanced professional development certification	<i>Certificate</i>
EDGE-AI Certification Top 5% performance — Internship	<i>Certificate</i>
5th Place - Technovent 2023 Hackathon SUST — 48-hour AI/ML innovation challenge	<i>Certificate</i>
